Terracon Project No. 25221049

Dear Ms. Hayley Rosser:

Terracon Consultants, Inc. (Terracon) provided testing and observation services for the new fueling station, canopy, and kiosk for the above referenced project from July 26, 2022 to November 9, 2022. To the best of our knowledge and available information, the soils, concrete, reinforcing steel, welded and bolted connections, asphalt, and concrete pavement that were tested and/or observed by Terracon for the site work were constructed in general accordance with the project plans, specifications, and approved RFI's by the Engineer Of Record provided to Terracon.

It should be noted that our testing and observation services were performed on an as-requested basis, and only when requested by our client or their designated representative. We offer no opinion regarding materials not tested or observed by Terracon representatives. This letter is provided solely for the benefit for the above-listed and does not impact in any way the rights and obligations of third parties, including contractors and subcontractors who may have provided the materials and/or construction services tested or observed.

Sincerely,  
**Terracon Consultants, Inc.**

Joseph B. Choi  
Assistant Project Manager

F. Stewart Ward, P.E.  
Senior Engineer
